Career Objective •

At Upsource by Solutions, I analyze customer interactions across SDAIA digital products, transforming user feedback and operational insights into opportunities for product and process improvement.

Backed by an honors degree in **Management Information Systems (GPA 4.46/5)** and a **Software Engineering foundation from Holberton School**, I bridge the gap between users, business needs, and technology. My focus is on turning customer insights and data into actionable requirements that enhance user experiences, optimize digital products, and deliver measurable business value.

Experience •

09.2025 - current •

Customer Experience Representative

upsource by solutions - Riyadh

- **CX & Product Analytics:** Analyzed customer interactions across SDAIA digital products (Nafath, Tawakkalna, Ehsan) to identify pain points, map user journeys, and improve user experience.
- **Cross-Functional Collaboration:** Collaborated with technical and business teams to communicate customer insights, validate issues, and optimize processes.
- **Data-Driven Insights:** Analyzed performance trends and customer feedback to deliver actionable recommendations that reduced friction and improved satisfaction.
